

What is it?

The Publisher Offices

I am tired of writing and printing all these advertisements.
Tons of paper sent out to different mailboxes...

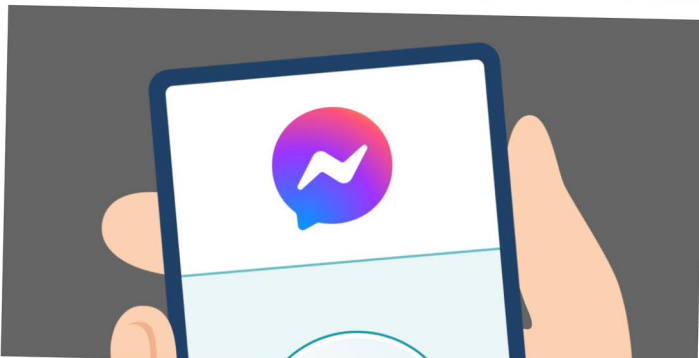

We also don't think about the environment,
too much trees are dying for our ads...

I wish there was another way!

There certainly is Lora! Have you heard of "Read It To Me"?
We can use the service to post samples of our publications and send them directly to our potential readers.

So they can check them out straight from the
Messenger app on their phones

and decide if they want to subscribe.
